ABSTRACT

Medicine is the most important thing in today's world because medicine is needed the most during this Corona period, and during this pandemic, medicine was not available immediately, so many people were inconvenienced. We had to go far from home to get medicine, we had to travel a long way in a short time to bring the medicine, sometimes even there the medicine was not available immediately, so many time and travel was wasted taking a look at all these situations, I have made this app, Medicare. It is a unique app. It is very necessary and very important app in the future. Come on guys there are various discount offers for the customers in this App, where the medicine is ordered and delivered at home, and thereby saving money. All types of medicine are readily available here. This android application is very necessary in Future. Because this app anybody can order various medicines safely and budget friendly.

Keywords: Medicine, Android Application, Visual Studio, Flutter, Dart Language.

I. INTRODUCTION

Online shopping has become very easy in today's world because online shopping is basically Saving your time as well as money. For this I have made Medicare only to order medicine in this app you can share medicine and see all types of medicine you can select the medicine you want and then select payment mode there net banking, credit card, phone pay, google pay as well as cash and delivery All these types of opt-ins are immediate and then you get a discount too. Once your payment is done, you will get a receipt from Medicare, the receipt will contain your medicine, the medicine card you took, how much the discount was, and when Medicare will provide you with your medicine. Also, you will find free delivery and if you don't want a medicine, you can return the medicine again with Medicare, it is very helpful. Also, the Medicare app is originally used by people in the market to avoid petrol, she reads it, and many times there are no nearby medical centers, so you have to go far to get medicine, so you often waste your money, so you can use the Medicare app only to order medicine. Use this app is quite handy and also needs no major pre-requesting.

II. METHODOLOGY

The Medicare app is made with the help of Dart Language and Flutter framework is used in it. This app works on Android and Mac systems. This is a mobile app, in the first page there is a login I'd and password to activate it. There are different ways to design the pages. Medicines are available there. You order the desired medicine, select the payment method, after payment, you will get home delivery, receipt and discount special offers.

Advantages of Medicare App

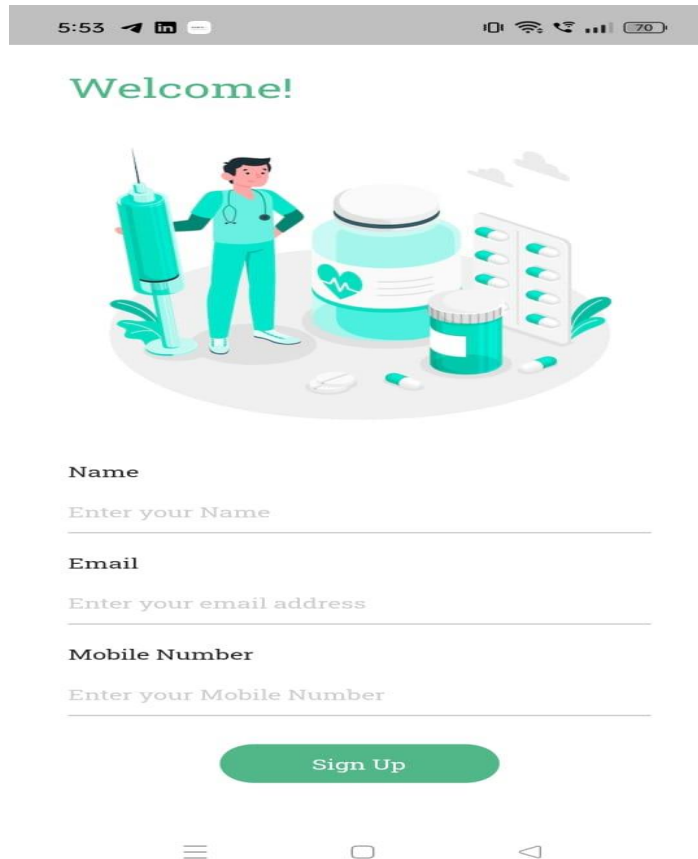

- 1) Time saving Only by Medicare app there is no need to go to the market to buy medicine, there is no need to stand in queue for a long time, the journey is saved and petrol is saved. And all types of medicines are always available in Medicare app, sometimes all medicines are not available in one shop
So there is a lot of medical travel, but this app Medicare do not need to travel a lot because all kinds of medicines are available on the Medicare app with discounts.
- 2) On Save Money Medicare you also find discount coupons and extra 50% discount on every medicine order.
- 3) Save Fuel Medicare is a unique way for you to order your medicine from the comfort of your home without having to go anywhere
- 4) Mobile application is a mobile application, you can download this app in a very easy way, all types of access are easily accessible to you, easily download the Medicare app from the play store and order medicine from the comfort of your home. This app is very clean and convenient.
- 5) Order Confirmation Once the customer's order is confirmed, you will receive an SMS on your mobile containing all the details of where and what time your medicine will arrive, as well as your name and address And then an employee from medicare will come and deliver your medicine to You.

6) Return policy, if the medicine you want is not delivered, you can return the medicine again and the medicine is delivered at home, and if you don't want it, you can return it.

Home delivery of benefit medicine is absolutely free, discount coupons are also available, even if you want to return the medicine, delivery is free, no charges.

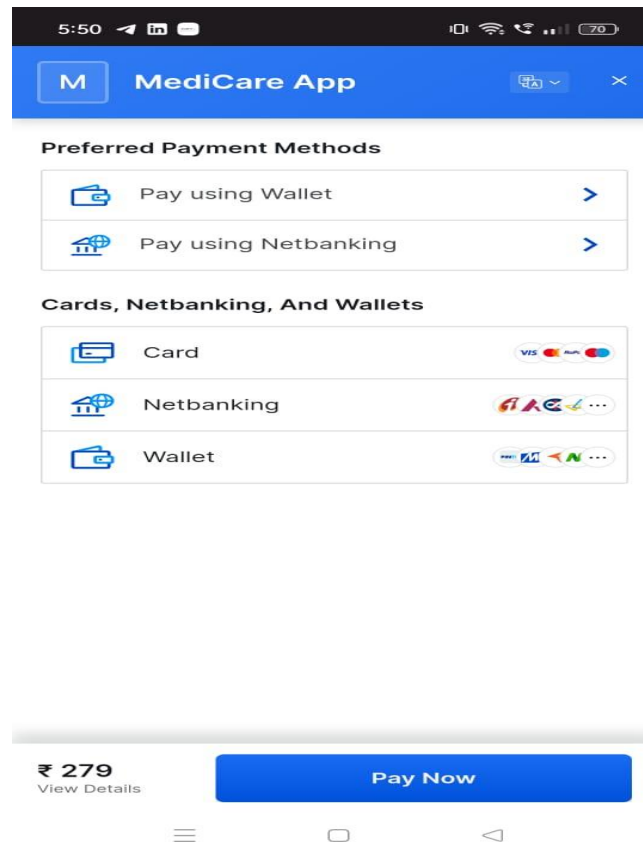

III. ANALYSIS AND DIAGRAMS

Login page :-

Details page:-

Payment Methods:-**IV. CONCLUSION**

Medicare only aims to make medicine order app so that customer can get medicine at right door and fastest home delivery and this app also has payment method so customer can make safe payment through regular payment method like credit card google. Pay Phone Pay Cash on Delivery are optional. Also, there are discount special offers as well. Our biggest aim is to get the customer on the medicine team and all types of medicines this is to be available at one place. Further this is going to be of great use to you as it has developed in a big way and is very convenient. Medicare is very helpful to us now as well as the new generation as you can order medicines from home. It is very convenient and clean. All types of medicine are available in this app so it is very important for the coming next generation.

ACKNOWLEDGEMENT

I give my Sincere thanks to my institute by providing me with the opportunity of publishing my research Medicare Application. I am thankful to my professors who provided me with the require guidance and knowledge on the Above-Mentioned topic and my parents my friends provided me the Appropriated resources and support me for.
